### Executive Summary

---

Engineering Leader with 12+ years of experience scaling high-performance platform organizations. Drove €2M+ in business impact and a 25-40% improvement in DORA metrics through cloud-native transformations and developer experience optimization. Proven ability to lead through influence across > 25 engineers, mentor technical talent, and manage complex cross-functional initiatives. Eager to leverage a decade of deep technical expertise and strategic leadership to transition into a full-time Engineering Manager role.

### Experience

---

#### OneFootball GmbH - Berlin — Staff Engineer & Platform Team Lead

*April 2023 Present*

- Architected an internal developer platform for 100+ engineers, reducing deployment complexity by 45% and enabling 4x faster feature delivery
- Architected cloud-native observability stack to ensure 99% uptime. Improved match latency for football scores 18%, increasing user session time 12%.
- Driving adoption to operationalize AI Tools in engineering for AI-enhanced tools and workflows
- Designed canary deployment framework enabling \$A/B\$ testing of infra changes with <1% error rate before full rollout.
- Implementing and driving safe testing/deploying strategies in production, reducing annual cloud spend by €350K while improving reliability.
- Revamp tech interview process improving hiring efficacy and quality by 30%
- Mentored cross-functional teams of 12+ engineers on automation, reliability, and scalability best practices, fostering continuous improvement culture
- Driving platform adoption across 15+ engineering teams, defining roadmaps ensuring developer needs alignment with organizational goals

#### HelloFresh SE - Berlin — Senior Platform Engineer & Squad Lead Trainee

*February 2021 March 2023*

- Drove pair programming and mobbing culture across 8 engineering teams, accelerating knowledge sharing and improving code quality by 60%
- Designed secure, scalable secret management using HashiCorp Vault, achieving enterprise-grade security compliance and improving developer productivity by 40%
- Spearheaded ephemeral, multi-tenant Kubernetes clusters supporting immutable environments, reducing engineering costs by 20% (€200K+ annual savings)
- Increased developer satisfaction score from 7.2 to 8.9 (internal survey), driving higher platform adoption
- As a Squad Lead Trainee Led strategic discovery and adoption of queueing systems integrating into 50+ microservices for reliability after APM metrics showed 32% latency reduction in staging

### **Airtel X Labs - Delhi, India — Lead Engineer & Technical Coordinator**

*October 2019 January 2021*

- Led DevOps team of 6+ engineers supporting B2C/B2B platforms, overseeing 100+ applications serving > 350M telecom subscribers
- Designed SDLC processes and infrastructure-as-a-service architecture, accelerating microservices transition and enabling 50% faster software delivery
- Built team from scratch to 5+ engineers through technical hiring process, interviewing 40+ candidates and improving capability assessment frameworks
- Architected distributed systems for scalable, cloud-native solutions reducing deployment time  $\geq$  30%

### **LimeTray (Acquired by Zomato) - New Delhi, India — Senior Software Engineer**

*2014 - 2019*

- Engineered high-throughput data pipelines and microservices platforms to process TB's of data and millions of daily events in real time, improving processing speeds by 50%.
- Implemented early CI/CD pipelines on Kubernetes clusters, reducing manual deployment efforts > 60% and enhancing system reliability to 99% uptime.

### **PS QuickIT - Noida, India — Data Platform Developer**

*2014 - 2019*

- Engineered high-throughput data pipelines and microservices platforms to process TB's of data and millions of daily events in real time, improving processing speeds by 50%.

### **MPS Digital Labs - Kanpur, India — Full-Stack Engineer**

2014 - 2019

- Developed web applications using Django/Flask with Rest APIs IoT automation solutions using Raspberry Pi

## Education

---

### Maulana Azad National Institute of Technology

*Bachelor of Technology, Urban and Regional Planning (2008-2012) - Bhopal, India*

## Core Competencies

---

### Engineering Leadership:

Platform Engineering, Process Improvement, Strategic Planning, Team Building, Engineering Culture, Technical Hiring

### Technical Architecture:

Cloud-Native Systems Architecture, Site Reliability Engineering, Kubernetes, Infrastructure as Code, API, Developer Experience

### Platform Technologies:

AWS, Terraform/Helm, \$CI/CD\$, Kubernetes/EKS, OTEL & Service Mesh, DevSecOps/MLOps/Finops, Secrets Management, Prometheus/Grafana-stack, Gitops, AI-powered workflows

### Languages:

Go, Python, Rust, JavaScript/TypeScript, Swift

### Business:

Cloud cost optimization, Performance Management, Incident Response
